Dear Pamela Monroe,

As a native and resident of New Hampshire, I voice the opinion that further degradation to the environment , especially in the form of towers and lines, is an irresponsible choice. The natural beauty of New Hampshire should be protected for generations to come. The Northern Pass will defile our landscape and erode the pride we hold for our land, its history, and beauty. Digging for Underground lines will disrupt the environment, residents and businesses. There is no gain for New Hampshire from this invasive plan. I strongly urge you to drop plans for the Northern Pass and respect the lives and opinions of those who live here.

Sincerely,
Sandra Mann
