October 12, 2017

Dear Pamela Monroe,

Hello.

I recently stood with brothers and sisters to show the representatives from the NP project that we do not want the pass running through our town of Plymouth. The proposed plan has the lines buried along Main Street, which brings with it many problems. The biggest problem is that the street will have to be shut down for up to 6-7 months to traffic. This will legitimately kill all of the businesses on that street, which is most of the business in town. The town cannot survive with Main Street closed to traffic for any length of time. It's that simple. There are tons, and tons of other issues with the project and where it's proposed, but this one example is too big to let it be buried in other examples.

Please, do the right thing. We, the people, do not want this. Only the people who stand to make profit want this. Liberty before money.

Sincerely,
Patrick Warn
