Dear Pamela Monroe,

Dear Ms. Monroe,

I am writing to express my concern over the Northern Pass project. Northern Pass may provide a few construction jobs but in the long run it will do irreparable harm to the environment and economy of New Hampshire. There is no way that New Hampshire residents will be compensated for the destruction of some of our most scenic natural areas. This will result in a loss of year round tourist revenue and permanent damage to our eco system. This project should not be allowed to go forward.

Sincerely,
John Kaplafka
