Dear Site Eval Committee,
I read in detail the Sunday NH Union Leader multi Page Ad castigating the Northern Pass project. Unlike the Stop Northern Pass Ad, I strongly believe that we in New Hampshire need new non-Coal & oil; sources of Electric Power for us and the Region. As such, I firmly support the approval and construction of Northern Pass to bring clean Hydro generated electricity to support our homes and improve our businesses.

Don McGinley
New Boston, NH

ps: The Northern Pass opponents seem to base 99% of their opposition on power lines impacting out NH views. I believe that NP will far less impact out views and our environment versus the damned Wind powered mills that cost us millions of \$\$\$ each while providing but a small amount of power (and draining our governments with large subsidies).
