### CommenterWords

If Northern Pass is supposed to help NH put it in writing how our energy costs will decrease PERMANENTLY not temporarily. Words mean nothing to them, they just buy people off. We hear them but know they don't have NH's interest at heart only their own and Canada's pockets. They have the money, send every house proof and a contract stating what our savings will be. The beauty of the state is at stake and once that is gone they won't care about NH.
