Dear Site Evaluation Committee,

Like many residence of New Hampshire I have been following the conversation about the proposed Northern Pass Project over the last few years. Unfortunately nothing I have read or listened to has convinced me that this project will have any long lasting positive benefits for our State, it seems like it will be just the opposite.

I am firmly opposed to the approval and construction of a project that will detrimentally change the character of our State. We are so dependent on tourist and others who visit and live in New Hampshire for its natural beauty, and this project will not serve to enhance this beauty. It will probably cause many people from different areas to vacation and live elsewhere, taking the potential revenue and tax dollars with them, and enhancing the pocket books of businesses in other states. It might also cause some investors to seek other locations when locating/creating a business, and that would bring job creation and the associated revenue stream to others.

The Northern Pass Project is just plain a bad idea for our state. Please vote in favor of the natural beauty of New Hampshire, not for the limited interests of companies or individuals who are only looking at enhancing their bottom line.

Please, vote NO to the Northern Pass Project
