Dear Pamela Monroe,

The Northern Pass project puts the interest of profits - most of which will not benefit us here in the Granite State - over the will of the people of New Hampshire to protect the pristine landscape is the lifeblood of our tourism industry in our livelihoods.

In an era where sustainable energy options like wind and solar show more promise for creating a brighter future for our children while also creating jobs in profits for green sustainable business owners, this project makes no sense.

As a lifelong New Hampshire resident, a father of two children, a husband of a small business owner, A skier and I lover of the outdoors, that you hear my voice and join me in opposition of the Northern Pass.

Please don't put profits before the will of the people, Josh Corringham and Family
