I am vehemently opposed to the proposed Northern Pass project for many reasons, perhaps the most obvious being the project's likely negative impact on New Hampshire's greatest treasure, our scenic attractions, on which our economy is largely based. The annual influx of "leaf peepers" and the tourism industry centered around skiing, hunting, canoeing, and all manner of outdoor pursuits would all be negatively impacted; in fact, the habitats for flora and fauna within and abutting all areas of the state used by the Northern Pass project would be in peril. People come to New Hampshire to enjoy its scenery and rural rhythms; people who stay, like myself, are resistant to change that is not beneficial to the state. The destruction of these sites to enable people in other states access to power is ludicrous and must not be allowed. I urge the members of the Site Evaluation Committee to block this project.
