Dear Ms. Pamela Monroe,

Please do everything within your power in order to prevent the construction of The Northern Pass power line thru New Hampshire.

When I retired and moved to Plymouth, New Hampshire three years ago I had no expectation then that a hideous high tension power line would be bisecting this beautiful state. A few of my attractions to New Hampshire were that my family had property here when I was a lad, I had four children who went to college in state, and the natural beauty of it's mountains, lakes, and hiking trails. I can't imagine the monolithic structures that are being proposed by Hydro Quebec that would permanently scar the natural beauty of New Hampshire from the north all the way to our southern border, this is certainly not what my wife and I had bargained for. To add further insult to injury, there would be no benefit to New Hampshire residences and business owners as none of the power generated would be available within the state and certainly no reduction in electrical fees would be passed on.

Please do everything within your power to reject this irresponsible and frivolous project. It is clear that a large majority, practically unanimous, of the New Hampshire state population is against such an initiative.

Thank you for your consideration and action,

Stephen J. Blanchette
