I want my opinion to be heard about the Northern Pass project. I am 100% against this project. I do not believe that it is necessary for our states power needs. From what I've read, most if not all the power coming down the line will be for out of state power users.

I don't think a 190 mile gash through our beautiful state will help our tourist and recreation industries. In fact, I believe it will hurt those industries.

Please vote against this project for the sake of the future of our amazing and beautiful state.
Thank you in advance.

Bill Higginbotham
