Please add my name to the thousands of people who are opposed to the Northern Pass plans. I have lived in Concord since 1982, and I have family land in Lancaster. Northern Pass would be a scar on the land, especially if it relied on giant metal towers. At a minimum it should be buried the whole way. But that would still leave a wide pathway through a beautiful state. There are other, and much better, options for getting power to southern New England. Please do what you can to not allow Northern Pass to proceed.
