VISIT SCENIC

NEW HAMPSHIRE

Dear SEC,

As noted by National Grid  
the Northern Pass project does  
not actually create any  
new clean energy generation.

I also do not see large  
hydro as a clean energy source  
because of the methane gas  
released as a result of the  
flooding of pristine lands.  
Finally, H<sub>2</sub>O is harmful to the  
salmon fishing of indigenous  
peoples.

Thank you,  
Patricia A. Ma
