This submittal is to express my opposition to the Northern Pass Transmission project. The natural beauty of this state is a fundamental reason why many of us choose to live in NH and why millions make this state a recreational destination. Destroying that beauty and simultaneously jeopardizing a key economic engine of this state is foolish and shortsighted. This is not to imply that I am against progress and development. Development that minimizes the environmental impact and maximizes the benefit for NH residents is welcome. This is not one of those projects.
