Amid a multitude of reasons against Northern Pass here are some that are so legitimate that I wonder where common sense went? 1. Real estate values near and or in sight of NP towers will be highly diminished. Please honestly ask yourself would you buy property next to or in sight of those towers? Is it fair to those people that live there? Lots of these people love where they live and do not want to move, even if NP offers them big money. How would you feel if you found your dream property and then monster towers were going to be coming through? Please put yourself in their shoes and think of your fellow granite stater for awhile. 2. NH in fact does not need the power. 3. Red Flag: Maine and Vermont said no to towers. Bury it in NH if they need it so bad. 4. If you love the Granite State, please do the right thing and say no to NP.
Thank you kindly,
