Subject: Northern Pass

New Hampshire legislators and political appointees have the mandate to protect New Hampshire. Please do not allow this foreign nation-controlled, CT- based parent company overhead power project to forever change the beloved landscape of our region. This is a for profit, unnecessary project which reduces our State to the role of extension cord in order to reach a lucrative revenue source. But for the geographic location of New Hampshire, we residents and small north country businesses would long have been "getting on with our lives", and not forced into a defensive posture against this Goliath. Please stand WITH us. Thank you, Thomas and Mary Bearor, Colebrook, NH.
