This is unnecessary and will do nothing except destroy our north country! We will not permit this too happen in the north country! We have to pay the price so Mass, RI and Conn. can get electric power because they don't want to produce it in their own state. SORRY THIS WILL NOT HAPPEN! I have seen the WIND power in the western states and it is a terrible blight on the landscape! Not to mention most were not turning because the system is faulty. Now you want to do the same with your power lines across our beautiful state. NO !!!!
