Dear Pamela Monroe,

New Hampshire Site Evaluation Committee (SEC)

I oppose the Northern Pass. Find an alternative, this is not about the people but that of BIG business and money. As I know it, the Northern Pass route relies on leasing rights of way from its sister PSNH d.b.a. Eversource. The New Hampshire legislature passed legislation in 2012 making it crystal clear that Northern Pass cannot take property by eminent domain. BUT PSNH d.b.a. Eversource can, and the rights of way it wants to lease to Northern Pass were acquired through eminent domain and easements purchased decades ago from people who wanted to help their neighbors get electricity. There's no question that PSNH d.b.a. Eversource would never lease these rights of way to a company that was not a subsidiary of Eversource. Indeed, some people believe Eversource Energy purchased the bankrupt PSNH 25 years ago with the goal of one day using its rights of way to build a high-voltage transmission line to bring hydro power from Canada to New England.

I strongly oppose the Northern Pass and Eminent domain!!!

Sincerely,
Kathy Narkewich
