Dear Pamela Monroe,

Please put an end to this travesty, This project is not for NH. It is not necessary or wanted by the people, and we should have a say in the matter. This project will ruin our landscape and compromise our environment forever. After this last windstorm and all the trees and lines down, just think if those monstrous towers were up, think of all the more damages and the power out for even longer.....Northern Pass is not the answer, there are other solutions, These need to be considered, not blindly follow Northern Pass's greed. Thank you for your time, I know you have a hard job.

Sincerely,
Holly Gray
