Dear Pamela Monroe,

Unless the High Voltage lines are completely suppressed, installed underground, the Northern Pass project should be rejected. There is enough money being made to both save New Hampshire's scenic beauty and provide for ample profit. Furthermore, the lines should be suppressed to protect against terrorism, weather anomalies, youth curiosity, thrill seekers, and provide modernization of the grid system. Don't give away New Hampshire's beauty to corporate greed mongers. Everybody knows that Corporations promises never materialize. Don't fall for it.

Sincerely,
Rich Wyatt
