I am very much against Northern Pass as it will ruin our beautiful scenic state by putting up ugly towers to look at instead of beautiful scenes of mountains and fields . We have to look at these awful wind towers now and I can't imagine what these new bigger towers will do to the landscape . Not only that but what benefit will they be to the state in the long run ? Are we in N.H. to become the dumping ground for some big company to bull their way through ? I pray not !!
