Dear Site Evaluation Committee,

I am personally opposed to the Northern Pass Project for several reasons. The first being the physical installation of the much taller and obstructive transmission towers. This would be a permanent eyesore that would have to be endured for many generations to come. I would imagine this would also have a negative impact on property values within close proximity to the project. Secondly, I'm sure I don't have all the information but I believe the power generated and economic benefit to the State of New Hampshire would be temporary and minimal. I read that most of the power would essentially be routed through the State and delivered to points south of NH?

For these reasons I am opposed to the project. Thank you for taking these thoughts and comments into consideration.

Sincerely,

Thomas Sexton
