Subject: Northern Pass Project

To:
Northern Pass SEC Committee Member

Before it is too late, I wanted to express my thoughts on the Northern Pass project.

I have lived in New Hampshire my whole life and love it. Our lakes, trees, mountains and streams attract people from all over the world in all four seasons. Nature is our product and we need to protect it. The Northern Pass project will be destructive, even if some lines are buried. There needs to be a better way of providing power to our southern neighbors without destroying the beauty of this great state.

I urge you to please consider alternatives and to keep in mind those beautiful views, mountains and vistas we look to when we need peace and quiet from the trials of everyday life.
