New Hampshire Site Evaluation Committee
Att: Pamela Monroe, Administrator
21 South Fruit St. Ste. 10
Concord, NH 03301

November 14, 2017

Dear Ms. Monroe and members of the NH SEC,

I am strongly opposed to the proposed Northern Pass project. Like thousands of others, I love New Hampshire's majestic mountains and pristine forests. Northern New Hampshire has unspoiled natural beauty which draws people to our state throughout the year.

Northern Passes' huge electrical towers would spoil miles of beautiful scenery and natural views.

As I understand it, this electrical project would not benefit the residents of New Hampshire either in terms of long term jobs or cheaper power.

Economically speaking, NH does not have an income tax. Tax revenue comes largely from property tax. Well, property tax revenue will definitely go down if property values decline as a result of views spoiled by unsightly power lines.

Let us not irrevocably spoil our natural heritage for questionable, short-term gain. Future generations will thank us for holding firm and preserving the beauty of New Hampshire.

Sincerely yours,

Hannah Delfiner
