### Commenter Words

Northern Pass would disfigure the face of our state. Permanently scarring our iconic landscapes, destroying vistas that represent what is unique about New Hampshire. It's ridiculous to damage the landscape with industrial grade steel towers that one would see regularly in New Jersey so that southern New England states would reap the most benefit while NH citizens would barely feel the effects of a \$20 lowering per year of electricity bill. Clearly this benefits the huge conglomerate electric company in Canada who reaps the most benefit from this disastrous Northern Pass proposal. No doubt our Governor probably gets a nice check to line his coffers as well while NH citizens live with visually displeasing industrial steel scars across our beautiful state that this stupid Northern Pass would inact. Republicans love the money huge company's give them to fulfill their agendas and our governor is no different. This is bullshit! End citizens united!!!
