I am a current senior in college at Hobart and William Smith Colleges in Geneva, NY. I grew up in the White Mountains of New Hampshire, Franconia specifically, and it breaks my heart to learn about the Northern Pass Project. To some people, the White Mountains may seem like any other forested, mountainous region, but to thousands of us, the White Mountains are our home, livelihood or favorite place to ski or hike. People are downplaying how much tourism will be affected if Northern Pass goes through...people WILL NOT spend their valuable vacation time somewhere where they have to look at large transmission towers. Tourism will be greatly affected and in turn, thousands of businesses and individuals that rely on outdoor tourism will be greatly negatively affected, as well. For a project that DOES NOT EVEN BENEFIT Northern NH, something else must be figured out. No one has the right to disrupt and destroy these beautiful, old forests for the means of big business and at the expense of people who call it home. Thank you.
