Despite DOE's willingness to ignore the clear flaws, New Hampshire is still NO TO NORTHERN PASS.

According to DOE's own analysis, Northern Pass will:

1. Cause adverse impacts to tourism and recreation.
2. Negatively affect the historic context of architectural resources.
3. Cause impacts to vegetated habitats and land disturbance, impacting archeological resources and wildlife, including protected species.
4. Result in long-term wetlands impacts as compared to the other action alternatives.
