Please DENY any permit for the ill-conceived Northern Pass project!!

This project would be DETRIMENTAL to the public interest - detrimental to private citizens and NH businesses. It would devastate the landscape and aesthetics with its massive unnatural, towers that would permanently mar the NH landscape, harming tourism - a top NH industry. This project would have a horrible and unreasonably adverse impact on the natural environment of NH.

I retired from active duty last spring and settled in NH. I have been to or live in 49 of 50 states, and I chose NH, in large part because of the natural beauty and the culture of stewardship. This project runs counter to all the values of NH that impressed me over the last 25 years that I have come here.

No private company should be permitted to devastate our landscape for purely private gain. There is NO need or demand for this project. It is entirely unnecessary, and its only purpose is for the company to pursue marketshare in Massachusetts. And this is NOT a green project - flooding hundreds/thousands of acres in Canada will kill all the vegetation where flooded, as well as wildlife that lived in that habitat. Decaying organic matter (drowned trees, etc.) produce methane and CO2.

JUST SAY NO. History will frown very negatively on anyone who gave approval to this project if it goes through. No material gain is worth infamy for devastating our home.
