I grew up in Campton NH. I returned after living out west for 10 years and bought a house off of route 3 along what I now know will be the line of Northern Pass. I moved back to N.H. To enjoy mountain biking, hiking And the beauty of the White mountains. It disgusts me, disappoints me and now my life savings that I bought a house with and family will be directly affected by the towers, the infrastructure and the destruction. This is heartbreaking for our town that money and politics are running the show here and our voices don't matter. I doubt that any of the decisions that are being made are by local people where those towers are being placed.
Heartbroken in Campton, NH
