It's glaringly obvious the people of New Hampshire will not be heard pertaining to Northern Pass. Having followed most of Eversource and their experts twisted testimony and lies of mass destruction to our State and Gov Sununu's continued support of Northern Pass project, the opposers galant efforts will have been made in vain. It is a sad day when even our own Governor will take money over our State and the people who elected him. It's a damn shame WE are made to bow down and give OUR land.

There is definitely a shortage of morales and severe lack of right and wrong. The politicians who are pro NP are showing the people their glaring cowardice and greed to big money. I'm sure they won't give NH a second thought while they're basking in the sun of their island beach homes as Northern Pass desecrates the New Hampshire landscape. There is a place, that is also warm, and waiting, for every...last...one ...of...you.....
