DateReceived	11-17-2017

CommenterWords

According to DOE's own analysis, Northern Pass will:

1. Cause adverse impacts to tourism and recreation.
2. Negatively affect the historic context of architectural resources.
3. Cause impacts to vegetated habitats and land disturbance, impacting archeological resources and wildlife, including protected species.
4. Result in long-term wetlands impacts as compared to the other action alternatives.

This is a shameful decision to approve a permit.
