To allow the Northern Pass Transmission project to go through would be a travesty. It would destroy some of the most magnificent, pristine wilderness remaining in the United States, as well as the livelihoods of the local residents who depend on tourist dollars. Just as bad, it would not provide benefits of electrification or anything else to the residents of the United States. Whatever power the project would generate would go only to Canada. Please reconsider the decision to allow the completion of the Northern Pass Transmission project. It would be a great hardship for the residents of the Northern Pass, and an insult to all Americans.
