I can't say that the view from my house will be affected, but I cannot understand why this destruction of our beautiful state is even a consideration. Politically, I am a Conservative and voted for Sununu and Trump, but I will not again if this goes through. There are other ways to get electricity to other states. Our scenic beauty is a major source of income for so many.....oh, you know all of this. The citizens don't want this. Period.
