What the heck is wrong with these people. It will not only be an eye sore to all who visit beautiful New Hampshire. But look at the wildlife impact. And to the people who has to look at them from their backyard. Shut down the project. Think of the impact this will have on all of us. And our wildlife friends who are being good and not be going into your homes or running downtown. So many of them will be killed because of northern pass. Show them that we care about our environment.
