We opposed the Northern Pass project unless it is fully buried. NH is a beautiful state, Driving up 93 can be a spiritual experience. Ugly steel towers ripping a line through our forests will be a jolt to the senses. It will affect tourists' perception of the beauty of the state. Businesses and homes around the towers will be negatively affected. To say otherwise is duplicitous. We certainly wouldn't have bought a house within view of an ugly steel tower - would you? Seriously - would you? Then why ask any NH citizen to endure a defiled neighborhood when burying is an option. Northern Pass says it's prohibitively expensive, which just means they'd rather have NH residents pay than lay out more money to do it right. They're a for profit company. We do not owe them our landscape. NH should have the backbone to demand to be treated with the respect it deserves. Bury Northern Pass.
