Please don't build this project. It will mess up the environment very bad, and there is enough of that going around already. Beautiful look-outs and scenery will be destroyed if you build this. I don't believe placing it underground will be much better. Clearly, it will be better for the environment, but not only will miles and miles of trees be clear cutted, but New Hampshire/New England doesn't need this energy so there is no reason to punish the land.
