To the members of the New Hampshire Site Evaluation Committee:

We are sure you have heard from thousands of NH folks who have expressed their strong opposition to the Northern Pass Project. Their reasons for opposing this project are many and all are very valid. They are not made up. They are not meant to deceive. They come from the heart of good NH people who just want to keep NH the beautiful state it is.

We also fear that if approved this will only be the beginning, setting a precedent that will create a rubber stamp for future transmission line projects. Projects that will continue to scar the landscape. Once altered it can never be restored.

We sincerely ask that you fine in favor of New Hampshire's scenic beauty and the wonderful people that live here, and oppose the Northern Pass Project.

Thank You,
Brian and Diane Thompson
Deerfield, NH
