We have been going up North for over 30 yrs, We decided to make this area our retirement home. We bought land on 333 Wiswell Rd. Clarksville NH. about 11 yrs ago.

I have worked at the Cheshire Medical Center for over 41 yrs. I work with Doctors who have informed me that being that close to those gigantic power lines would not be good for me or my husband. My husband who as Heart problems, and myself being a cancer survivor.

We have worked so hard on this piece of land, and now it's been on hold for over 7 years.

Everything has come to a halt, all our dreams have been put on hold, waiting for the out come of your decision on these power Lines. The Lines will be right behind our retirement home. Which we will have to sell. This will break our Hearts.

The scenic views are what brings everyone up North.

We don't want these overhead towers or power lines to ruin our beautiful New Hampshire lands.

Please make them Bury Northern Pass.
