Good afternoon,
Thank you for taking the time to read my input on this important project. I have researched the background on the Northern Pass option and I would like to register my preference for the Granite State Power Link (GSPL) alternative to this project. After reviewing the impact studies, it is clear that the negative impact to the local economies in New Hampshire under the Northern Pass project would be more substantial than that under the GSPL.

I will be taking this into strong consideration when casting my votes for candidates going forward at all levels of our government.

Thank you kindly,

- Dan Yarrington
