To the SEC regarding the proposed Northern Pass Project: Please listen to the people of NH!!!! We do not need or want this project!!! This is our state , our lives and our way of life and we should have a say in it!!. This northern pass is not good for NH in so many ways: our environment compromised forever, very little economic gain, what little short termed. Northern Pass is not the only solution to the so called energy crisis. There other options to explore, without all the damages to our environment. NH is being raped for nothing, not even being charged with a ROW. Please listen to the people and STOP NORTHERN PASS NOW!!! thank you and how can you even issue a presidential permit , when the hearings are not even over???
