Please don't let the Northern Pass project become a reality. It provides no benefit to our beautiful state. At the same time the project simply ruins a vast area right down the center of New Hampshire which will damage tourism, hurt so much business that depends on it, and reduce property values. Don't let this wonderful place become a door mat to be stepped all over by a huge electrical project that simply sees New Hampshire as nothing but an inconvenience to be brushed aside because it happens in their way. Please keep our state what it is now. Don't let Northern Pass become a reality!!!!
