Bullied again! For the second time little New Hampshire is being picked on as the place to defile. First it was taking big chunk out of our pathetic 18 mile cost line for a Nuclear reactor (Seabrook) to power Massachusetts (NH Hampshire has less than 1/2 million households (and not all are part of the power pool) where is the rest to go, Massachusetts. That reactor was fought for years, and Massachusetts won. Now northern pass. It seems only the people in the approval process do not know this power is also for Massachusetts! First our coast line and now our forest and main industry. Bullies. Our rates will not go down, bullies do not share.
