Although I now live in Holderness, I have lived (1956-1972) and worked (1980-2017) on the main street of Plymouth for several decades as noted . I am aware of what changes have taken place from the mid-1950's to today. The main street, if dug up for an unspecified period of time, could do great damage to the point of a few businesses going under. Some businesses continue to struggle since the growth of Tenney Mt. Highway expansion as ease of parking, lacking from the main street, is essential for these in-and-out businesses.

Why an alternative to the current site (main street) dig site could not be chosen, knowing the short & long term damage to the town's main street businesses, behooves me. The lack of time specifics leads me to request the Committee re-think the Plymouth Main Street dig site to be re-considered.
