Subject: Northern Pass

Dear Ms. Monroe,

I imagine you are very busy.

I will save you some time and let you know right away that I can not emphasize enough that Northern Pass must be stopped.

There have been far too many lies and wrong-doings that have gotten the progress to where it is. The people of NH do not want it, and that has been made clear at demonstrations, rallies, in letters to the editors, and in letters to government officials.

Please listen to the people of NH, not businesses who misrepresent the truth and the benefits. There is clean energy sources out there and this is not the solution.

The effects on the Pemigewasset River corridor is just one of the many areas that has been grossly underrated as damaging.

IO know you have heard the many, many reasons why NH residents do not want it.

Proof of that , more than anything else, is that this battle has gone on as long as it has.....

a battle being fought by simple residents on one side, and multi-million dollar corporations on the other, with teams of lawyers, and enormous resources.

Imagine how much the citizens must care to be able to put up a fight against such a giant!!!

Please think about the David and Goliath situation, and remember that the residents are so small and weak individually compared to Eversource and the other agencies pushing for this.

So, there have to be an enormous number of people resisting this to be able to maintain this battle.

This proves how much the people of NH do not want Northern Pass.

Please respect their wishes and their months of standing up for their beliefs.

Respectfully,
Andrea Burns
Sanbornton, NH
