December 2, 2017

Dear Pamela Monroe,

This initiative will create a major unsightly scar through our entire state, thus reducing the appeal for tourists to visit our state. There is no major benefit to NH, as this will not reduce our electric costs. I see no need to provide Massachusetts and Connecticut with cheaper electricity at the expense of our state. If Northern Pass feels the need to run a new transmission line, let them run it through Vermont where there is already an existing right-of-way or bury it all the way through our state.

Sincerely,
Dianne McLaughlin
