

## Northern Pass Citizen's Comment – **Opposing**

---

As a citizen of New Hampshire, I am opposing the Northern Pass project because: in its present form the environmental, social, economic and visual costs are too great. Many citizens of the north country feel we have been sold out by New Hampshire politicians.

It can be argued that since this hydroelectric power is available it should be used.

Why not bury the line in an old railroad bed or an energy corridor along the interstate highway?
