

Northern Pass Citizen's Comment – **Opposing**

12/3/17

As a citizen of New Hampshire, I am opposing the Northern Pass project because: I believe it

should be a buried line for the whole length of the
project. There are other projects in the NE that are
proposed/designed/being built that way so it
is possible and economically viable.

The aesthetics (mountain views) are one of NH's greatest
and most valuable assets. Tourism is one of the biggest
economic drivers for the state. The currently proposed towers
would seriously degrade that economic resource.
