### CommenterWords

I am begging this committee to listen to the voices of NH who will be impacted by this project and protest against it for those of us who wish to keep NH beautiful. We have many tourists who will agree that towers and cables are not what they want to view.

It appears that Northern Pass is moving along without approval. They are going to win come hell or high water and NH citizens be damned!

Worst case scenario then all exposed cable should be BURIED!!!

No doubt they will have to wait a bit longer to make money on this project and frankly I don' care!

Sincerely,  
Janet Vaglica
