Hi. I am 10 years old and I already like the view of New Hampshire the way that it is. I don't like the idea of seeing power lines just destroying the view. It could also hurt many people if they got too close to the power lines. I want to grow up seeing New Hampshire with lots of trees and a beautiful view. I really like the country feel in New Hampshire and that would be lost with big power lines. If I were an animal and I saw builders destroying my land, and replacing it with junk, I would run away. Please keep New Hampshire the way it is.
