Dear Pamela Monroe,

I really don't have to explain to you that destroying natural animal habitat and rural people's lives to line the pockets of a select few rich people and your own in the bargain, is plain wrong, because you know this.

Here's what you have conveniently forgotten, this will come back to haunt you, in spades.

This is the roaring twenties all over, millionaires became billionaires at the expense of the working class.

Murican idiots have elected one, and guess what agenda is being served?

Now billionaires will become trillionaires, until the doodoo hits the fan, then EVERYONE will be depressed, that's why they call it the Great Depression.

Sooner or later they will come with the pitchforks and you will be the ones directly responsible for millions of people in misery and nothing left to lose.

Good luck on that day.

Sincerely,
dennis gelinas
