Dear Pamela Monroe,

It's been very disappointing to watch PSNH/Eversource and the dishonest way they chose to sell this project to the citizens of NH as well as our legislatures for the last 8 years. Other utility companies have already proposed bringing power to NH using existing corridors that meet the needs and wants of NH citizens without scarring our towns and forests. I hope you take into consideration that, these NH towns most affected by this have already voted against Northern Pass as proposed.
Thank you for your time

Sincerely,
Michael Marchand
